

# THE BIG CODE CHALLENGE

Global Coding Competition by HackerEarth

✓ <b>REAL &amp; LEGITIMATE</b>	Hosted on HackerEarth Platform
✓ <b>COMPLETELY FREE</b>	No hidden costs or fees
✓ <b>GLOBAL REACH</b>	Compete with developers worldwide
✓ <b>CAREER BOOST</b>	Get noticed by top tech companies

## What is The Big Code Challenge?

The Big Code is a legitimate global programming competition hosted on HackerEarth, a well-established developer assessment platform. Thousands of developers participate in solving real-world coding problems, competing on a global leaderboard, and showcasing their skills to potential employers. This is not a scam—it's a genuine opportunity to grow your programming skills and connect with top companies.

## Why Participate?

- Improve your programming skills with real-world problems
- Compete globally and see where you rank among developers worldwide
- Build your professional portfolio with competition achievements
- Get noticed by recruiters from leading tech companies
- Network with developers from around the world
- Access learning resources and discuss solutions with the community
- Earn certificates and badges for your resume

## How The Big Code Works

Step 1	Create free account on HackerEarth.com
Step 2	Browse available coding challenges
Step 3	Select problem and read requirements
Step 4	Code your solution in the online IDE
Step 5	Submit and get instant feedback
Step 6	View your performance and ranking
Step 7	Solve more problems to climb leaderboard

## What You Can Expect

### Online Coding Environment

Code directly in your browser. No software installation needed. Supports Python, Java, C++, JavaScript, Go, Rust, Ruby, and more.

### Real-World Problems

Solve algorithm and data structure problems used in actual tech industry interviews.

### Instant Feedback

Get immediate results showing which test cases passed/failed and execution time.

### Global Leaderboard

Track your rank against thousands of developers competing worldwide.

## Who Can Join?

- Students learning to code
- Self-taught programmers and beginners
- Professional software developers
- Career changers entering tech
- Tech enthusiasts and hobbyists

## Important Information

<b>Is it real?</b>	YES. HackerEarth is a legitimate platform used by 1000+ companies for hiring.
<b>Cost?</b>	Completely FREE. No registration fees, no hidden charges.
<b>Time?</b>	Self-paced. Solve problems when you want. Some contests have specific schedules.
<b>Requirements?</b>	Just a computer, internet, and a web browser. Nothing to install.
<b>Languages?</b>	Python, Java, C++, JavaScript, Go, Rust, Ruby, PHP, C#, and more.
<b>Certificates?</b>	Yes. Earn certificates and badges for your LinkedIn profile.
<b>Job Opportunities?</b>	Real. Top performers often get contacted by recruiters.
<b>Support?</b>	Active community forums, discussions, and editorial solutions available.

## Tips for Success

- Start with beginner-level problems to build confidence
- Read problem statements carefully and understand all requirements
- Test your code with provided examples and edge cases
- Use the discussion forums to learn from others
- Solve problems consistently to improve your ranking
- Focus on understanding algorithms, not just quick solutions
- Practice different problem types and difficulty levels

## Getting Started Now

### Step-by-Step Guide:

**Visit the Website:** Go to [www.hackerearth.com/challenges/the-big-code](http://www.hackerearth.com/challenges/the-big-code)

**Sign Up:** Create a free account (email or GitHub/Google login)

**Browse Challenges:** View available problems sorted by difficulty

**Pick a Problem:** Choose one that matches your skill level

**Start Coding:** Write your solution in the online IDE

**Submit & Learn:** Check results and learn from solutions

**Compete:** Keep solving to improve your rank
